

Barracuda Email Security Gateway Vx

Complete Protection from Email-Borne Threats

Virtual solutions are ideal for IT professionals who are looking for consolidation and cost savings. The Barracuda Email Security Gateway Vx is **a comprehensive email security solution that blocks email-borne attacks**, while also providing the extra features needed to ensure business continuity.

- ☑ Security
- ☐ Storage
- ☐ Application Delivery

The Barracuda Advantage

- Free Cloud Protection Layer providing:
 - Email spooling up to 96 hours
 - Inbound email filtering
- Barracuda Real-Time Protection
- Outbound email filtering for DLP
- Cloud-based encryption included free of charge
- Configuration backup to the cloud
- Preconfigured for quick deployment
- No per-user or per-server fees

Product Spotlight

- Industry-leading spam and virus defense for email
- Protection from data loss and reputation damage
- Advanced Threat Protection* to protect against ransomware and other advanced threats
- Advanced, granular policy management

Comprehensive Protection for the Long Term

The Barracuda Email Security Gateway Vx includes spam and virus blocking, data protection, email continuity, DoS prevention, encryption, and policy management—combined to deliver a complete solution. As new requirements emerge, it is automatically updated with new capabilities to ensure continuous protection.

Complete Email Threat Protection

The Barracuda Email Security Gateway provides multi-layer security, email continuity, and data leakage prevention. Advanced Threat Protection* combines behavioral, heuristic, and sandboxing technologies to protect against zero-hour, targeted attacks and ransomware.

Affordable and Easy to Use

Fast, easy set-up and simple, intuitive management keep time and resource needs low. The integration of the Barracuda Cloud Protection Layer and no per-user fees make it easy and very affordable to scale capacity as your business grows.

Barracuda Cloud Protection Layer filters and spools inbound email traffic.

Virus and inbound/outbound filtering at an affordable price. If it wasn't for the Barracuda Email Security Gateway, we most likely wouldn't be filtering at all, due to the high costs of other vendors' per-user pricing structures.

Technical Specs

Comprehensive Protection

- Spam and virus filtering
- Cloud Protection Layer
- Prevents spoofing, phishing, and malware
- Denial of Service (DoS/DDoS) protection
- Directory harvest protection
- Outbound email filtering

DLP & Reputation Loss

- Maintain compliance
- Prevents reputation loss and blacklisting
- Pre-defined filters (e.g., HIPAA, credit card, and U.S. Social Security Numbers)

Sender Authentication

- SPF and DomainKeys
- Emailreg.org
- Invalid bounce suppression

Advanced Policy Control

- IP and content-based filtering
- Bulk email categorization
- Content encryption
- Sender/recipient filtering
- RBL and DNSBL support
- Keyword blocking
- Character-set blocking
- Reverse DNS blocking
- URL pattern and category blocking
- TLS encryption policy
- Secondary authentication

Spam Filter

- Rate control
- IP reputation analysis
- Fingerprint and image analysis
- Rules-based scoring algorithms

Virus Filter

- Triple-layer virus blocking
- Integrated Exchange AV Agent
- Decompression of archives
- File type blocking
- Barracuda Antivirus Supercomputing Grid
- Advanced Threat Protection* to protect against ransomware, zero hour and targeted attacks.

End Users

- User-based filtering
- Individual spam scoring
- Personal allow and block lists
- End-user quarantine and digest emails
- Outlook
- Bayesian analysis

Deployment Options

Virtual Appliance

- Hardened OS
- Seven models to choose from
- Common Hypervisor Support including VMware, Microsoft Hyper-V, KVM, and XenServer

Support Options

Barracuda Energize Updates

- Standard technical support
- Hourly spam definition updates
- Barracuda Reputation Databases
- Fingerprint and intent analysis definitions
- Hourly virus definition updates

MODEL COMPARISON	100	300	400	600	800	900	1000
