The Barracuda Web Application Firewall blocks an ever-expanding list of sophisticated web-based intrusions and attacks that target the applications hosted on your web servers—and the sensitive or confidential data to which they have access.

**The Barracuda Advantage**

- State-of-the-art security utilizing full reverse-proxy architecture
- Malware protection for collaborative web applications
- Employs IP Reputation intelligence to defeat DDoS attacks
- No user-based or module-based licensing
- Designed to make it easier for organizations to comply with regulations such as PCI DSS and HIPAA

**Product Spotlight**

- Comprehensive inbound attack protection including the OWASP Top 10
- Built-in caching, compression, and TCP pooling ensure security without performance impacts
- Identity-based user access control for web applications
- Built-in data loss prevention
- ICSA certified

**Identity and Access Management**

The Barracuda Web Application Firewall has strong authentication and access control capabilities that ensure security and privacy by restricting access to sensitive applications or data to authorized users.

**Affordable and Easy to Use**

Pre-built security templates and intuitive web interface provide immediate security without the need for time-consuming tuning or application learning. Integration with security vulnerability scanners and SIEM tools automates the assessment, monitoring, and mitigation process.

**Constant Protection from Evolving Threats**

The Barracuda Web Application Firewall provides superior protection against data loss, DDoS, and all known application-layer attack modalities. Automatic updates provide defense against new threats as they appear. As new types of threats emerge, it will acquire new capabilities to block them.

**Protect servers, applications, and data from web-based attacks.**

With the Barracuda Web Application Firewall in place, we are demonstrating to our customers and partners that we are serious about the security of their data. It lets our staff to worry less about backend security and concentrate more on providing quality services to our partners and customers.

Michael Fainshtein
Chief Technology Officer
CredoRax.
**Technical Specs**

**Web Application Security**
- OWASP top 10 protection
- Protection against common attacks
  - SQL injection
  - Cross-site scripting
  - Cookie or forms tampering
- Form field meta-data validation
- Adaptive security
- Website cloaking
- Response control
- Outbound data theft protection
  - Credit card numbers
  - Custom pattern matching (regex)
- Granular policies to HTML elements
- Protocol limit checks
- File upload control
- Geo IP location
  - Anonymous Proxy

**DDoS Protection**
- Barracuda IP Reputation Database
- Heuristic Fingerprinting
- CAPTCHA challenges
- Slow Client protection

**Application Delivery & Acceleration**
- High availability
- SSL offloading
- Load balancing
- Content routing

**Logging, Monitoring & Reporting**
- System log
- Web Firewall log
- Access log
- Audit log

**SIEM Integrations**
- ArcSight
- RSA enVision
- Splunk
- Symantec
- Custom

**Support Options**
- Instant Replacement Service
  - Replacement unit shipped next business day
  - 24x7 technical support
  - Hardware refresh every four years

**Hardware Options**
- FIPS 140-2 HSM Model Available
  - Optional Ethernet Bypass

**Management Features**
- Customizable role-based administration
- Vulnerability scanner integration
- Trusted host exception
- Rest API
- Custom Templates
